Vol 1 Personality Theories and Models

# The SAGE Handbook of Personality Theory and Assessment

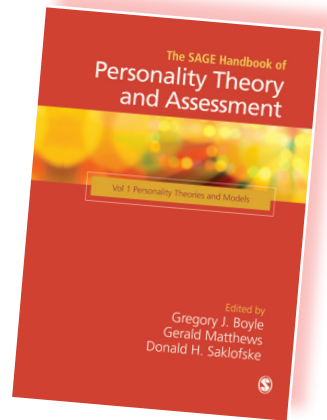

Edited by **Gregory J. Boyle** *Bond University, Queensland*, **Gerald Matthews** *University of Cincinnati* and **Donald H. Saklofske** *University of Calgary*

Personality theory and psychometric assessment is rapidly becoming one of the fastest growing areas of psychological research and practice. **Personality Theories and Models** is the first part of an up-to-date and internationally focused two-volume **Handbook of Personality Theory and Assessment**.

Edited by Professors Gregory J. Boyle, Gerald Matthews, and Donald H. Saklofske, it is poised to become the essential resource for shaping the future of personality research, measurement and practice.

Unrivalled in both depth and scope, this volume collects together world renowned experts to provide a critical evaluation of the major theoretical models underlying personality instruments. Comprehensive sections on trait models will provide a unique source of reference for measurement issues associated with the various personality models.

Divided into six sections this work will be an important reference for a host of researchers and practitioners in the fields of individual differences and personality assessment, clinical psychology, educational psychology, work and organizational psychology, health psychology and other applied fields.

# The SAGE Handbook of Personality Theory and Assessment

Edited by **Gregory J. Boyle** *Bond University, Queensland*, **Gerald Matthews** *University of Cincinnati* and **Donald H. Saklofske** *University of Calgary*

The second volume draws together a group of internationally acclaimed authors to provide an unprecedented in-depth coverage of the psychometric measurement of personality, focusing in detail on the leading measures and methods in personality assessment. Each chapter will briefly outline the development of the particular assessment instruments, provide an in-depth description of the theoretical underpinnings, critically review the psychometric and empirical basis of the respective instruments and extensively describe the clinical applications.

**Personality Measurement and Testing** is an essential resource for all those practising or conducting research in all applied fields, especially individual difference and personality assessment, educational psychology, clinical psychology, work and organizational psychology, and health psychology.
