MAJOR IN PSYCHOLOGY
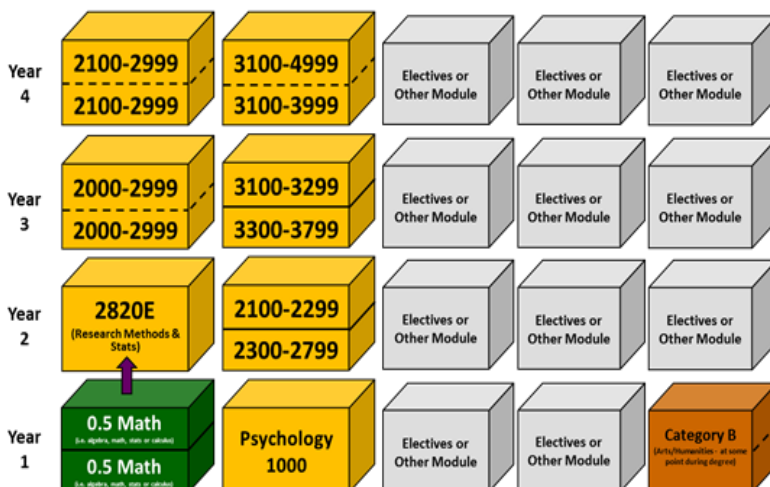

Purpose of Major Module: To provide a thorough grounding in the principles of Psychology for students who are interested in a career in fields such as business, education, law, the health sciences, social sector employment, or entering the job market immediately after finishing university.

Admission Requirements: To be eligible for admission to the Psychology Major Program, students must complete a minimum of 3.0 first-year courses, including 1.0 course from Psychology 1000 with a final grade of at least 60% and 1.0 course in first-year university Mathematics. Please see the "Mathematics Requirements" under Future Students on our Psychology Undergraduate homepage, where it lists first-year Math courses and their high school prerequisites. The recommended first-year university Math courses are Math 1228A/B and Statistical Sciences 1024A/B.
A student may combine a Psychology Major with a Major from another discipline to obtain either a **Double Major** (min. 60% average in each module) or an **Honours Double Major** (min. 70% average in each module and no modular course grade below 60%). Alternatively, the Psychology Major may be combined with a Minor, or a Specialization or an Honours Specialization in a different discipline.

Psychology Major

Psychology Major Requirements:
1.0 credits Psychology 1000
1.0 credits Math (recommend Math 1228 and Stats 1024)
1.0 credits Psychology 2820E
